- > Fast removal of clips.
- > Non-slip rubberized grips.
- > Durable chrome finish.

U.S. Patent #5,735,031

INNOVATIVE
TOOLS & TECHNOLOGIES, INC.

The Universal Hood Blanket Clip Removal Tool is designed for the removal of difficult one-way style clips found on many of today's newer vehicles.

The Patented double V design works great on the standard style push clip by holding it tightly during removal preventing the clip from falling into the engine compartment, saving you time and money.

Simply slide the tip of the blades under the clip from any direction and squeeze the handle. The double V design will collapse the shaft of the clip allowing you to save and reuse the clip.
