

PROTECT BACK-OF-CAB AREAS FROM DAMAGE

Innovative Truck Cab Protectors

create a layer of protection between cab and bed when removing beds for repair or replacement.

- Large heavy duty pads slide over each side of truck bed front
- Adjustment knobs, on bed inside, keep cab protectors parallel and in place on both sides

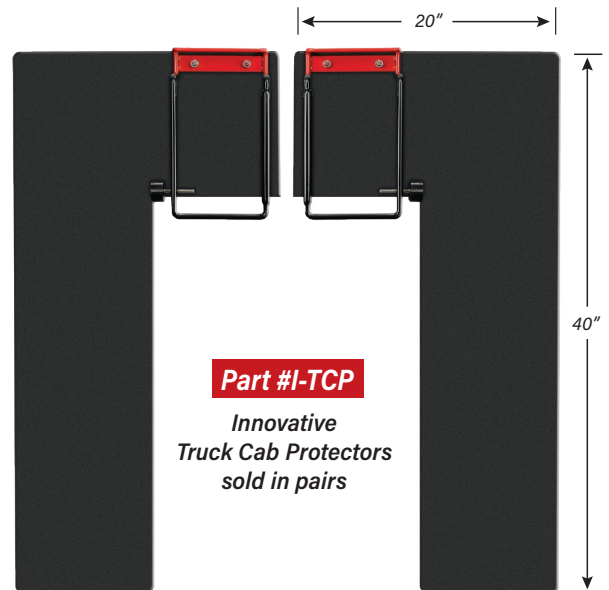

Optional *Innovative Truck Bed Dolly* provides a mobile or stationary platform for repairs

Adjustable knob keeps pads parallel to truck bed sides

Innovative Cab Protectors slide into position in seconds between cab and box - whether removing or reinstalling the truck bed

Part #I-TCP
Innovative Truck Cab Protectors sold in pairs
